

Md. Zakir Hossain was born in Munshiganj District. He completed his Bachelor's degree in Civil Engineering from Bangladesh University of Engineering & Technology (BUET), where he developed a strong grounding in structural analysis, design, and engineering problem-solving.

He began his professional career in the private sector, working with Meghna Group as a Structural Engineer. In this role, he gained hands-on experience in large-scale industrial and commercial projects, contributing to structural planning, safety, and execution with a practical, results-oriented approach.

Later, he was selected through the highly competitive 27th BCS (1st Result) for the Railway Engineering Cadre and joined the Ministry of Railways. He is currently serving in Bangladesh Railway, where he applies both his academic excellence and industry experience to support infrastructure development, maintenance, and modernization of the national railway network.

With a solid blend of BUET-trained engineering rigor and real-world industry exposure, Md. Zakir Hossain brings a practical and forward-looking mindset to railway engineering and public service.
